Health and Safety:

It is important to keep your mind on the task at hand. Focus on the job at hand and ensure that hazards are identified.

Weather

Warm summer conditions with possibility of showers late in the week

Sampling and Monitoring Activities

- Sampling and monitoring, (EPEA and Long Term Sampling and Monitoring Program), have returned to spring / summer requirements as outlined in the Long Term Sampling and monitoring Plan, 2015. An amendment request to reduce the sampling frequency on near-field sites was submitted June 11, 2015
- Data Tables have been included in the transmission.
- Extra sampling was completed from ponds that discharge to Baseline Creek (East Limb Pond 1 and South Plateau Pond 3). Additional sampling has taken place and results will be communicated as received.

Personnel (during the period)

Backwoods – Monday-Thursday 4, Friday-Sunday 2.

Hatfield 2

EPO Operations Update:

Visual inspections of the sediment traps, silt curtains and stream flows are ongoing. Sediment trap clean out evaluation and scheduling is currently underway. Updated bathymetry data was collected June 10th. A work plan for the sediment removal is in development and will be communicated to the AER once complete. The AER will be notified in advance of the clean out process and will record and sample material collected as per the requirements under the Solids Recovery Plan and Report.

Weed assessments were completed along Apetowun Creek June 16 and 17.

Inspection of the EPO area set for July 15th, 2015

EPO Communications Update:

DFO completed their fluvial geomorphological work along Apetowun and Plante Creeks.

Alberta Health has requested that the HHRA not be released publically until after they have had time to provide feedback and comments to the updated versions. The HHRA is anticipated to be released publically mid June.
